PROFILE

Software Development Engineer candidate with a strong foundation in Data Structures & Algorithms, Object-Oriented Programming, and DBMS — 150+ DSA problems solved on LeetCode and GeeksforGeeks. Hands-on experience building and deploying scalable, full-stack web applications using JavaScript, React.js, Node.js, Express.js, and MongoDB/MySQL, with a focus on clean architecture, API performance, and reliability. Thrives in fast-paced, product-based environments and Agile teams.

EDUCATION

• Indian Institute Of Information Technology, Bhopal	2024 – 2027
Master of Computer Applications (MCA - IT)	CGPA: 6.98
• Ranchi University, Ranchi	2020 – 2023
Bachelor of Computer Applications (BCA)	CGPA: 8.76

EXPERIENCE

• Eimple Labs	Mar 2023 – Jul 2023
Web Development Intern	Bangalore
– Collaborated with the engineering team to design, build, and test web application features using JavaScript and Express.js.	
– Wrote clean, efficient, and well-documented code; styled front-end web pages using HTML, CSS, and JavaScript based on design specifications.	
– Debugged and troubleshoot application issues across environments, and participated in code reviews contributing to best practices in software development.	
• Cyber Gyan	May 2025 – Jun 2025
Cyber Security Virtual Intern	
– Researched cybersecurity fundamentals, performed network threat analysis, and conducted vulnerability assessment using Tenable Nessus.	

PERSONAL PROJECTS

• CampusHire (MERN Stack)	2026 – Present
Full-stack placement management platform — designed, built, tested, and deployed live	
– Designed, built, and tested a full-stack web application — modular, object-oriented code across React.js, Node.js, Express.js, and MongoDB (NoSQL).	
– Integrated RESTful APIs for data communication between frontend and backend services; optimized queries and API response times for better performance.	
– Configured secure JWT authentication, role-based access control, and CRUD operations for managing jobs and applications.	
– Deployed the application end-to-end on the web, and maintained the codebase with clean, well-documented code and thorough debugging.	
• AI-Powered Resume Recommendation Engine	2026 – Present
Python-based NLP/Machine Learning pipeline for automated resume screening	
– Built a Machine Learning pipeline in Python using NLP techniques — TF-IDF and Cosine Similarity — to match resumes against job descriptions.	
– Developed a text preprocessing pipeline (tokenization, stop-word removal, vectorization) to score and shortlist applicants.	
– Designed RESTful endpoints to send matched scores directly to recruiter dashboards, reducing manual screening time.	

TECHNICAL SKILLS

Programming Languages: C, C++, Python, JavaScript

Web & Frameworks: HTML, CSS, JavaScript, React.js, Node.js, Express.js, REST APIs

Databases: MySQL, MongoDB

Tools, Cloud & ML: Git, GitHub, VS Code, Postman, AWS (Basic), NLP (TF-IDF, Cosine Similarity), ChatGPT, GitHub Copilot, Cursor

Coursework: Data Structures & Algorithms, DBMS, Object-Oriented Programming (OOP), Computer Networks, Operating Systems, Cybersecurity

Practices & Soft Skills: Agile Development, Code Reviews, API Integration, Git/GitHub, Debugging & Troubleshooting, Problem-Solving & Analytical Skills, Communication

POSITIONS OF RESPONSIBILITY & LEADERSHIP

• Lead Coordinator — Rangrez: The Fresher Fiesta: Directed end-to-end event logistics, strict schedule management, and cross-team execution for university events.	2025
• Sports Coordinator — MCA Department, IIIT Bhopal: Coordinated departmental sports events, inter-college tournaments, and departmental logistics.	2025

ACHIEVEMENTS

• 150+ DSA Questions Solved on LeetCode and active on GeeksforGeeks using C++.	2026 – Present
